

## SecureX SirenGuard – Long Range Indoor Siren with Strobe Light

SKU: SXSIREN120-LORA-SX

Version: v1.0

Date: 2026-02-25

Document type: Datasheet + Manual

### Short summary

SecureX SirenGuard is a powerful wireless indoor siren with integrated strobe light for the SecureX security system. It provides clear acoustic and visual warning during alarms and can be used both locally and via the SecureX hub.

## 1. Key features

- Powerful siren up to 110 dB
- Integrated strobe light
- Long Range wireless communication
- Tamper alarm on removal
- Adjustable volume
- Selectable alarm sounds
- Adjustable alarm duration
- Built-in rechargeable lithium battery
- USB-C power supply 5V / 1A
- NC/NO wired input

## 2. Technical specifications

- Modell: SXSIREN120-LORA-SX
- Power supply: DC 5V / 1A (USB-C)
- Battery: 3.7V rechargeable lithium
- Communication: Long Range via SecureX hub
- Max sound level: 110 dB
- Alarm duration: 30 sec / 1 min / 3 min / 5 min
- Tamper protection: Yes
- Temperature range: -20 °C to +50 °C
- Humidity: <95% non-condensing

## 3. Package contents

- 1 × SecureX SirenGuard siren
- 1 × Mounting plate
- Mounting screws
- Manual

## **MANUAL**

### **4. Installation**

Mount the siren on a wall where sound and light can spread effectively. Avoid moisture, heat sources, and metal surfaces behind the unit.

Connect power via USB-C or use the built-in battery. Pair the siren with the SecureX hub and test the functionality.

### **5. Usage**

When an alarm is triggered, the siren sounds and the strobe light flashes. Volume, alarm sound, and alarm duration can be adjusted using the buttons on the unit.

### **6. Troubleshooting**

- No response: Check power and battery
- Cannot pair: Move closer to the hub and try again
- Short range: Place the device closer to the hub or use SecureX SignalMax
